

## SCEExpert™ Release Notes

**Version: 4.12.1.10**

**Release date: April 27, 2025**

### Issues:

#	Description
1.	When multiple Task Assignment Policy lines are defined with the same <b>Priority</b> and <b>Task Type</b> , but different <b>Task Sub Types</b> , the Task Manager service did not properly take into account the <b>Task Sub Types</b> .  Now, the Task Manager Service correctly takes <b>Task Sub Types</b> into account.
2.	When a load was moved to a location and as a result merged with another load, the Load Location Changed event (Event #32) was sent without a <b>ToLocation</b> .  Now, the Load Location Changed event is sent with the ToLocation properly populated.
3.	When a <b>Shopify Import Plugin</b> ran, the system did not relate to <b>LastRunTime</b> and imported old data.  Now, the Shopify Plugin considers <b>LastRunTime</b> and imports data accordingly.

### Technical Appendix:

#	General
1.	Replace <b>WMS.Logic.dll</b> in the following directories:  \Workstation\bin folder.  \RDT\bin folder.  \Services folder.
2.	Replace <b>WMS.Logic.dll</b> in the following directories:  \Workstation\bin folder.  \RDT\bin folder.  \Services folder.
3.	Replace <b>SCEExpertConnectShopifyPlugin.dll</b> in the /Services folder.
