

## SCExpert™ Release Notes

**Version: 4.12.1.15**

**Release date: August 13, 2025**

**Issues:**

#	Description
1.	<p>The system did not allow identifying a load by scanning the location and a SKU identifier other than the SKU.</p> <p>Now, loads can be identified by scanning the Manufacture SKU, Vendor SKU, Other SKU or EAN/UPC along with the Location.</p> <p><b>RDT → Counting → Load Count</b></p> <p><b>RDT → Receiving → Load Move</b></p>
2.	<p>When units were allocated from a single load for both Picking and Replenishment purposes, the Units Allocated were set to 0 if the replenishment was performed before picking.</p> <p>Now, the Units Allocated field is correctly updated with the remaining allocated units after each replenishment or picking task is performed.</p>
3.	<p>The Zone Replenishment Scheduler did not generate any replenishment jobs even when replenishment requirements were met.</p> <p>Now, the Zone Replenishment Scheduler generates the necessary replenishment jobs whenever the requirements are met.</p>

### Technical Appendix:

#	General
