

SCExpert™ Release Notes

Version: 4.12.1.16

Release date: September 3, 2025

Issues:

| # | Description |
|----|---|
| 1. | You could not add an image to a SKU. Now, you can add an image to a SKU. Workstation → Masterdata → SKU |
| 2. | The Shipment export file did not include the Custom Field data for Outbound Orders, Flowthrough Orders and Transshipments. Now, the Shipment export file for all the above documents includes the Custom Field data. |
| 3. | When a SCExpert License was issued or updated, the License service needed to be restarted for the changes to be implemented. Now, when a SCExpert License is issued or updated, the License service does not need to be restarted. |
| 4. | You could not preview Quick Reports. Now, you can generate and preview Quick Reports throughout the system. |
| 5. | The system did not fully support the latest versions of Excel and presented a warning message when attempting to open downloaded reports. Now, SCExpert supports the latest version of Excel and does not present any warning messages when opening the reports. |
| 6. | We have optimized the way the application connects to and retrieves data from the database. This improvement enhances performance, reduces latency, and ensures more reliable access to data across the system. |
| 7. | The scoring mechanism performance has been improved to handle such cases when a large number of scoring parameters and data results need to be sorted. |
