

SCExpert™ Release Notes

Version: 4.12.1.4

Release date: November 14, 2024

Issues:

#	Description
1.	Some DT field expressions of type Value stopped working following a security update. Now, DT expressions of type Value are functioning properly.
2.	When a Flow Through order was assigned to a Shipment and the Shipment was shipped, the Flow Through order status did not change to Shipped. Now, when shipping the Flow Through order via the Shipment, the status of the Flow Through order changes to Shipped.
3.	When a user that was assigned to multiple Location Count tasks dismissed a Location Count task from the RDT (by clicking Back on the Task Manager screen), all the Location Count tasks that were assigned to the user are unassigned. Now, when the user clicks Back on the RDTs Task Manager screen to dismiss a Location Count task, the user is ONLY unassigned from this particular task.
4.	The user was forced to enter the Location when performing Load Count. Now, the system allows the user to enter just the Load ID for confirmation. RDT → Counting → Load Count
5.	The user was forced to enter the Location when retrieving the load during Full Replenishment. Now, the system allows the user to enter just the Load ID when retrieving the Load. RDT → Replenishment → Full Replenishment
6.	The Signature link did not open the confirmation image. Now, the image opens in a new tab when clicking the link. Workstation → Delivery → Route Tasks (RA)

7.	<p>When creating loads via the RDT and Workstation and setting a Reason Code, the Reason Code did not show in the Audit.</p> <p>Now, the Create Load event (Event # 41) includes the Reason Code and is written to the Audit.</p>
8.	<p>The option Unload From Shipment did not show in the RDT after upgrading the system to version 4.12.1.</p> <p>Now, the option Unload From Shipment shows.</p> <p>RDT → Picking → Unload From Shipment</p>
9.	<p>There were issues installing SCEExpert with SQL Server 2016.</p> <p>Now, all installation scripts support SQL Server 2016 and above.</p>

Technical Appendix:

#	General
1	<p>Replace m4nExpression.js in the Workstation\m4nClientScripts folder.</p> <p>Replace Made4net.Schema.dll in the Workstation\bin folder.</p> <p>Replace Made4net.Shared.dll in the Workstation\bin folder.</p>
