

SCExpert™ Release Notes

Version: 4.12.1.5

Release date: January 6, 2025

Issues:

#	Description
1.	<p>When the user created a new load during the Location Count process, the non-counted loads were not set to LIMBO.</p> <p>Now, when the Location Count is ended without counting all the loads, all non-counted loads will be set to LIMBO.</p> <p>RDT → Counting → Location Count</p>
2.	<p>When the system was set to use Single Sign On (SSO) authentication, users were not redirected to the SSO login page when they were disconnected using the License Console (-LC) screen.</p> <p>Now, when the system is set to SSO authentication and users get disconnected, they are redirected to the SSO login page.</p>
3.	<p>Under certain conditions, when more than one load was delivered simultaneously into a location and got merged into an existing load, the load quantity was not updated correctly.</p> <p>Now, load merge mechanism was enhanced to handle simultaneous load merge events.</p>
4.	<p>It was not possible to run reports which search criteria screen contained fields of type DateTime.</p> <p>Now it is possible to run reports that are based on DateTime search.</p>
5.	<p>When loads were merged, the merge included the Receipt of the “Incoming” load but not its’ Receipt Line.</p> <p>Now, when an incoming load is merged both the Receipt and Receipt Line are updated.</p>
