

SCEExpert™ Release Notes

Version: 4.12.1.9

Release date: April 16, 2025

Issues:

#	Description
1.	<p>When a Flowthrough Order is over-received, the Flowthrough Order Detail Quantity Staged field shows the original quantity ordered and not the actual quantity received.</p> <p>Now, the Flowthrough Order Detail Quantity Staged field shows the actual quantities that were received and staged.</p>
2.	<p>Screens that contain a Progress Bar take a long time to load due to duplicated calls to the database.</p> <p>Now, screens that contain a Progress Bar load faster.</p>
3.	<p>Added the ability to invoke the DT Importer utility via the Command Line.</p>
4.	<p>When the user initiates Location Count for a specific location, the system may assign the user to a different Location Count Task if one is available.</p> <p>Now, when the user initiates Location Count, the system will assign the user ONLY to the same location's Location Count task.</p> <p>RDT > Counting > Location Count</p>
5.	<p>During Location Count, when a load is counted to an amount that generates a discrepancy of a decimal amount (i.e. 0.9), the decimal amount is written to Limbo. However, when the user clicks End Count, the system would round the counted amount, causing the Limbo quantity to change.</p> <p>Now, once the user clicks End Count, the Limbo quantity does not change.</p> <p>RDT > Counting > Location Count</p>
6.	<p>The Unload From Shipment screen did not open.</p> <p>Now, the Unload From Shipment screen opens successfully.</p>
7.	<p>The values of Dropdown fields that are not inside a Table Editor were not translatable.</p> <p>Now, Dropdown fields are translatable.</p> <p>Workstation → Warehouse → Inbound Process → Receipt (RE)</p>
