

SCEExpert™ Release Notes

Version: 4.12.1.36

Release date: May 15, 2026

Issues:

| # | Description |
|----|--|
| 1. | When setting a Receipt with a scheduled appointment to At Dock, the appointment scheduling data was cleared. Now, setting a Receipt to At Dock preserves its appointment scheduling data. |
| 2. | When unpicking a load from an Outbound Order in status Loading, the Outbound Order status did not revert to Picking, preventing the order from being planned again. Now, when a load is unpicked from an Outbound Order in status Loading, the Outbound Order status is set to Picking. |
| 3. | When posting Inbound Orders and Transshipments to SCEExpert via the SCEExpert Web API, the Company Type field was not imported. Now, the Company Type is correctly included and imported for both Inbound Orders and Transshipments. |

Technical Appendix:

| # | General |
|----|---|
| 1. | Replace WMS.Logic.dll in the Workstation\bin folder. |
| 2. | Replace WMS.Logic.dll in the Workstation\bin folder. |
| 3. | Replace SCEExpertWebAPI.dll in the RestAPI\SCEExpertWebAPI\bin folder. |
