

SCEExpert™ Release Notes

Version: 4.12.1.39

Release date: June 10, 2026

Issues:

#	Description
1.	<p>Server-side expressions with expression type Value did not work in Input In Grid fields.</p> <p>Now, server-side expressions of type Value are fully supported in the Input In Grid fields.</p>
2.	<p>The SCEExpert Delivery App displayed routes that were not assigned to the logged-in driver.</p> <p>Now, the application displays only the routes assigned to the current user.</p>
3.	<p>The Remote Printer Client could disconnect from the Server after running for an extended period, and automatic recovery did not occur. As a result, users had to manually restart the service or the client tray application to restore connectivity.</p> <p>Now, the Remote Printer Client automatically recovers and reconnects when a disconnection occurs, eliminating the need for manual intervention.</p>
4.	<p>Printing PDF documents using Remote Printing could occasionally result in errors.</p> <p>Now, memory management has been improved to prevent these errors and ensure more reliable PDF printing.</p>

Technical Appendix:

#	General
1.	Replace WMS.Logic.dll in the Workstation\bin folder.
2.	Replace SCEExpertConnectSBO10Plugin.dll in the Servies folder.
3.	Install the latest version of the Remote Printing Client.
4.	The new installer supports automatic upgrades from previous versions, eliminating the need to uninstall the existing version before installation.
