

SCEExpert™ Release Notes

Version: 26.1.1

Release date: July 21, 2026

New Features:

#	Description
1.	In SCEExpert Mobile, when a button was configured to use an extension of custom Object DLL and Object Name, the request was routed to the default MobileBFF API instead of the configured API. Now, SCEExpert Mobile screen-command submit buttons correctly route requests to the API configured by the Object DLL and Object Name settings, enabling support for custom extensibility APIs.

Technical Appendix: New Installation

If this is your first installation of **SCEExpert version 26.1.1**, follow the steps below:

1. Download the installation package from the Partners Portal.
2. Extract the package to a local machine.
3. Navigate to:
SCEExpert_26.1.1_installer/Documentation
4. Follow the instructions in the Installation.pdf document.

Upgrade Instructions

If **SCEExpert version 26.1** is already installed and you want to upgrade to version **26.1.1**, perform the following steps.

Pre upgrade steps:

1. Backup the SCEExpert database.
2. Backup the SCEExpert root folder.
3. Download the installation package from the Partners Portal.
4. Extract the package to a local machine.
5. Obtain the server FQDN name <https://theserver.company.com> for each component below , if on the same server use the same one, as you will need them when you run the SYS Upgrade script.

Upgrade Steps:

1. Stop all SCExpert services.
2. Stop the IIS.
3. Uninstall SCExpert version 26.1.
Note! You will need to approve all warning messages.
4. Navigate to:
SCExpert_26.1.1_installer/Documentation
5. Follow the instructions in the Installation.pdf document.
Note! Uncheck the Database Installation option.
At this point, you have the latest SCExpert version installed, and you are ready to perform the database upgrade.
6. Open the SYS upgrade script and replace the server with FQDN names you obtained as part of the pre-upgrade steps. The script can be found as part of the installation package in the following path: /Additional Updates/DBScripts/SYS/SCExpert_SYS_Script_26.1.1.sql
7. Run the SYS upgrade script.
8. Start the IIS.
9. Start the SCExpert Services.
