

SCEExpert™ Release Notes

Version: 4.12.1.42

Release date: July 15, 2026

Issues:

#	Description
1.	An error occurred when the user created a new load during Location Count after being redirected from Location Bulk Count. Now, the user can successfully create a new load during Location Count.
2.	When an expression of type Format was applied to a date field, the screen displayed an error. Now, the date field is displayed correctly when a Format expression is applied.
3.	When working with multiple browser tabs, users were able to access the default warehouse even though they were not assigned to it. Now, users can only access warehouses to which they are assigned.
