

SCExpert™ Release Notes

Version: 4.12.1.48

Release date: September 1, 2026

Issues:

#	Description
1.	When importing Shopify Variants to SCExpert, the imported data was missing the associated Product information . Now, Shopify Variant imports include the associated Product information .
2.	When a grid screen included a Textbox with Link configured with Target = _self , clicking the link opened the target screen correctly but also opened a new blank tab and made it the active tab. Now, clicking the link opens the target screen correctly in the same tab , without opening a new blank tab.
3.	Fields defined in the Data Template (DT) with Display Type = TypeAhead and Hidden = True were not displayed correctly in the Search screen when switching to Extended View . Now, TypeAhead fields are displayed correctly in Extended View .
4.	When a user was assigned to multiple tasks and selected the Get Task option from the RDT, the system did not sort the tasks according to the RDTTASKREQUESTORDER system parameter. Now, tasks are sorted according to the RDTTASKREQUESTORDER System Parameter.
5.	When a user selected multiple shipments and pressed the Cancel Shipment button, the system only cancelled the first shipment instead of cancelling all selected shipments. Now, the system cancels all selected shipments when the Cancel Shipment button is pressed. Workstation → Warehouse → Outbound Process → Shipments
